

Eagle Moose Lake Property Owners Association

May/June 2019

Mission Statement

The Eagle Moose Lake Property Owners Association (EMLPO) is a group of volunteer lake stewards that advocate for the health and preservation of our lakes. The association will communicate to and educate members related to the sustainable lake environment and enjoyment of Eagle, Moose, and Glen Lakes.

THANK YOU for your membership!

Dear Neighbour and EMLPO member,

Please enjoy your copy of the **LAKE HEALTH REPORT**, a publication of the Coalition of Haliburton Property Owners Associations (CHA, www.cohpoa.org). This report brings together, in one place, 9 years of lake health data available from the Ministry of Environment, the Ministry of Natural Resources, and results from the shoreline assessment project called **LOVE YOUR LAKE**. The report includes data for 118 different lakes in the Haliburton region so readers will be able to see where their lake stands and compare with other lakes in the region, especially those that feed into our lakes.

We appreciate your membership and continued support of our mission to advocate for the health of our lakes. This summer marks the 3rd anniversary of the formation of EMLPO and we continue to strive to increase membership. More members equals more awareness.

On the reverse of this letter please find a new membership application form. Please use the Lake Health Report and this form to encourage your neighbours to join EMLPO today!

**** SAVE THE DATE – August 10th 2019 – 10am at Sir Sam’s Inn ****

Please join us this summer at our annual meeting. We will have a guest speaker from the Coalition for Equitable Water Flow (CEWF) and we would like input from members about pertinent issues that EMLPO could prioritize. If you cannot attend, we will endeavour to post meeting notes and/or an audio recording of the meeting on our website (<https://emlpo.ca>).

Have a great summer!
